

THIN CLIENT SERIES

Have the power of a complete computer system without the bulk on your desk by creating a dependable client-server architecture network with the Thin Client Series. Client systems are quieter, put out less heat and use 80% less power. Not only is the carbon footprint smaller but so are the physical dimensions.

Special features:

- Security is greatly enhanced through the ability to centralize all data.
- Significant cost savings in desktop management
- Unify desktop experience for all users across different client systems
